Put the following code to the header element for jQuery library:

```
<script src="https://code.jquery.com/jquery-1.9.1.js"></script>
```

Put the following code into the HTML block for the "Remember me" checkbox:

```
<label class="checkbox">
    <input type="checkbox" value="remember-me" id="remember_me">
Remember me</label>
```

Put the following code into the footer element for the jQuery code:

```
<script>
    $(function() {
        if (localStorage.chkbx && localStorage.chkbx != '') {
            $('#remember_me').attr('checked', 'checked');
            $('#xip_Name').val(localStorage.usrname);
            $('#xip_Password').val(localStorage.pass);
        } else {
            $('#remember_me').removeAttr('checked');
            $('#xip_Name').val('');
            $('#xip_Password').val('');
        }
        $('#remember_me').click(function() {
            if ($('#remember_me').is(':checked')) {
                // save username and password
                localStorage.usrname = $('#xip_Name').val();
                localStorage.pass = $('#xip_Password').val();
                localStorage.chkbx = $('#remember_me').val();
            } else {
                localStorage.usrname = '';
                localStorage.pass = '';
                localStorage.chkbx = '';
            }
        });
    });
</script>
```
